

Self-Perceived Health IN THE NORTHWEST TERRITORIES

What does self-perceived health mean?

Self-perceived health refers to the perception of a person's health in general. Health means not only the absence of disease or injury but also physical, mental and social well-being.

IN 2014,
51%

of people in the NWT over the age of 15 reported very good or excellent self-perceived health.
