

Viral Respiratory Illness Hospital Admission or Death Reporting Form

Healthcare professionals (HCPs) have a legislative duty to report notifiable and reportable diseases to the Chief Public Health Officer (CPHO) as required in the NWT Public Health Act (2009, SNWT 2007, c.17, SI-007-2009), with required information and timelines for reporting as defined in the Disease Surveillance Regulations (2009, R-096- 2009). This information is used for territorial and national surveillance and informs public health planning and interventions.

When to report:

Event	Timeline for submitting report form to OCPHO after making a diagnosis or forming opinion	
Viral Respiratory Illness Hospital Admission	24 hours	
Viral Respiratory Illness Death	24 hours	

What to report:

Report a confirmed case (see below) with viral respiratory illness requiring hospital admission (ward), ICU admission, or results in death within the reporting timelines outlined above.

Confirmed	Clinical illness* in a person with confirmation of viral infection (e.g. SARs-CoV-2, influenza, RSV) from an					
Case:	appropriate clinical specimen documented by:					
	 Detection of viral nucleic acid via laboratory molecular assay (e.g. polymerase chain reaction (PCR), nucleic acid amplification test (NAAT)) OR Detection of viral nucleic acid via validated rapid molecular assay (e.g. point-of-care (POC) NAAT that does not require confirmatory laboratory testing) 					
	OR					
	Isolation of virus from appropriate clinical specimen					
	*clinical illness = signs and symptoms consistent with reported viral infection					
Hospitalization	Confirmed case who:					
(includes ICU admission)	 Is admitted to hospital (ward or ICU) for at least an overnight stay OR 					
	 Their hospital admission is prolonged for reasons directly or indirectly related to their infection, and with no period of recovery between illness and admission 					
	If unable to determine whether an admission or prolongation was related to viral infection, please report as a hospitalization case					
Death	A death occurring in a confirmed case with no period of complete recovery between illness and death, unless there is evidence that their viral infection did not contribute to their death (e.g. trauma, poisoning, drug overdose).					

How to Report

Please send completed report forms to the OCPHO by:

Report Method	How-to	
Medical Confidential Fax	867-873-0442	
Secure File Transfer	outbreak@gov.nt.ca	

Viral Respiratory Illness Hospital Admission OR Death Reporting Form

SECTION 1: CASE INFORMATION								
e	Last Name:	First Na	First Name:					
Affix patient label	HCN: Da		Date of Birth:					
	Home Community:		Province/Territory:		Other:			
Affix	Sex assigned at birth: Male Female Intersex Unknown							
	Gender Identity: ☐ Male ☐ Female ☐ Other: ☐ Unknown							
SECTION 2: CASE VIRAL ILLNESS INFORMATION (CHECK ALL THAT APPLY IF CO-INFECTION PRESENT)								
 □ COVID-19 (SARS-CoV-2) □ Influenza □ Respiratory syncytial virus (RSV) □ Other, please specify: SECTION 3: LABORATORY SPECIMEN TESTING INFORMATION (COMPLETE ALL THAT APPLY) 								
	Test Type	Specimen Collection Date						
	PCR	Specimen conection bate						
	POCT (e.g. IDNow) POSITIVE ONLY							
	SECTION 4: CLINICA	AL COUR	SE AND OUTCOM	IES_				
Admitted to hospital or hospital stay was prolonged as a result of their illness (does not include ER visits):		☐ Y		□ No	□ Unknown			
If hospitalized, was the case admitted to the intensive care unit (ICU):		□ Y	'es	□ No	□ Unknown			
Did the case require transfer to a medical facility out of territory (OOT) ? (e.g. transfer to Alberta)		□ Y	'es	□ No	□ Unknown			
Date admitted to the hospital: Date admitted to ICU (if applicable):								
Dec	eased: ☐ Yes, Date: ☐ No ☐ Unknown							
If deceased, indicate cause of death:								
	SECTION 5: REPORTING HEALT	H CARE	PROFESSIONAL II	NFORMATION				
Office of the Chief Public Health Officer Phone: (867) 920-8646 Medical Confidential Fax: (867) 873-0442 SFT: outbreak@gov.nt.ca
