

Travel To/From Shelter

The shelter provides safe refuge, support and information to women and their children who are in danger and in need of shelter from any form of abuse.

While at the shelter, women are offered emotional support, crisis intervention, safety planning, advocacy, and information on topics such as the cycle of violence, healthy relationships, parenting and grief and loss. The shelter provides a safe, non-judgemental and supportive environment to help women become active agents in their own lives and make their own choices. Through our collaboration with agencies, women also have access to other services while at the shelter.

A woman's length of stay in the shelter is flexible depending on her needs, wishes, and personal circumstances, up to a maximum of six weeks. It is her choice as to how long she wishes to stay at the shelter and what services she chooses to access to meet her goals.

Women who come to the shelter from another community must be guaranteed a return ticket to their home community and access to this transportation when they choose to leave.

My signature indicates that I understand the services offered by the shelter and I understand my obligation to provide transportation for:

(Client's name and number of children)

to the shelter. I hereby agree that her/their return portion of the trip will be available to her when she chooses to return to her home community.
