# Food Establishment Inspection Report

This food premises inspection was carried out by an Environmental Health
Officer with the Department of Health and Social Services

Inspections are carried out under the authority of the Public Health Act

# **Food Safety Tips**

#### CLEAN

- Wash your hands frequently with soap and water before handling food or eating, and after handling raw meats, using the toilet, touching pets and animals and changing diapers
- Wash counters, utensils, cutting boards, and other surfaces after they come into contact with raw meat.
   COOK
- Cook all meats, poultry, and eggs to a proper internal temperature, as listed in the table below.
- Keep all hot foods at 60°C (140°F) or more, to prevent the growth of bacteria.
- Use a kitchen thermometer to check cooking and storage temperatures.

## CHILL

- Chill all leftovers promptly to keep them out of room temperature
- Refrigerate all perishable foods at 4° C (40° F) or less, to prevent the growth of bacteria.
- Thaw frozen foods in a refrigerator, cold water, or a microwave oven, not at room temperature.

### SEPARATE'

- Use separate cutting boards for raw meats, and raw fruits and vegetables.
- Store raw meats below ready-to-eat foods, on lower refrigerator shelves, to prevent dripping.

NON-CRITICAL ITEMS: Based on the inspection today, the non-critical items identified below are violations of the Food Establishment Safety Regul. tions. Non-critical items must be corrected by the next routine inspection or a shorter period of time as may be specified by the inspector. Failure to comply wi any time limits for corrections specified in this notice may result in revocation or suspension of your Food Establishment Permit and closure of your establishment.

<u>1e /Temperature of Potentially Hazardous Foods</u> Id Holding Temperatures ≤ 4°C (101) Potentially hazardous foods not stored in a manner that allows for quick cooling Potentially hazardous food temperature in excess of 4°C t Holding Temperatures ≥60°C (102) Potentially hazardous foods that have been prepared, cooked, and are to be served hot, not held at a temperature of at least 60°C. oking Raw Foods of Animal Origin (103) Raw foods of animal origin and food mixtures containing raw foods of animal origin should be cooked to heat all parts of the food to the minimum temperatures and for the minimum times outlined for different foods in Appendix B of the Food Retail and Food Services Code of Canada. Raw foods of animal origin and food mixtures containing raw foods of animal origin not stirred, to ensure that all parts of the food are heated to the minimum temperatures and for the minimum times outlined above. per cooling time & temperatures (104) Potentially hazardous foods that have been cooked and are intended to be kept under refrigerated storage prior to serving, are not cooled from 60 °C to 20 °C or less within two hours and then from 20 °C to 4 °C or less within 4 hours. Potentially hazardous foods prepared at room temperature and intended to be kept under refrigerated storage prior to serving, are not cooled from 20 °C to 4 °C or less within 4 hours. Potentially hazardous foods that are intended for immediate consumption, are displayed or held for service at room temperature for more than 2 hours equate Equipment to Maintain Food Temperatures (105) Inadequate equipment /space available for keeping all potentially hazardous food at 4 °C or less Inadequate equipment for proper holding temperatures of hot food oper Monitoring of Temperatures (106) All potentially hazardous foods requiring temperature controlled environments to extend their shelf lives or limit microbial growth not transported, stored or distributed in equipment that consistently maintains those temperature controls. Equipment units without accurate and reliable temperature control and without monitoring. Temperature control units not maintained at appropriate temperatures for potentially hazardous food. oper Reheating Procedures (107) Potentially hazardous foods that have been cooked, then cooled to 4 °C not reheated to 60 °C or higher in a manner that they will pass through the Danger Zone (4 °C to 60 °C) as quickly as possible. Potentially hazardous foods that have been cooked, cooled to 4 °C, reheated and then re-cooled to 4 °C, not reheated to 74°C or higher with the total time between 4 °C and 74°C exceeding 2 hours. Potentially hazardous foods that have been cooked, and then cooled to 4 °C once, served for immediate service at any temperature but the time the food spends between 4 °C to 60 °C exceed 2 hours. Potentially hazardous foods that have been cooked, cooled to 4 °C, reheated and then re-cooled to 4 °C served, for immediate service, not reheated to 74°C or higher. per Thawing Procedures for Frozen Food (108) Potentially hazardous foods not thawed quickly. Potentially hazardous foods not thawed in a manner that will prevent the rapid growth of pathogenic bacteria. Where the thawed portions of the potentially hazardous foods are above 4 °C, the time period above 4 °C, including the time for cooking preparation or the time required to cool the potentially hazardous foods to below 4 °C, exceeds 4 hours. Temperature of thawing ready-to-eat seafood not maintained at 3.3 °C or less during thawing. rsonal Hygiene of Food Service Workers inds Clean & Property Washed (201) Food handlers not washing their hands each time after using the washroom, when returning from a break, after snacking or eating, after handling raw food products, or after any other activity or instance where hands may become soiled. lequate Handwashing Facilities Supplied & Accessible (202) Handwashing facilities for food handlers are not accessible. Handwashing facilities not supplied with soap and hand dryer (or disposable paper towels) od Handlers Free Of Disease or Condition That May Spread Through Food (203) All operators and personnel of food premises not demonstrating responsibility for ensuring that food products are handled (throughout storage, preparation, display, service and presentation) in a manner which prevents contamination. Personnel who come into contact with food are not free from symptomatic signs of illness or communicable disease that is transmissible through food. Personnel with open wounds participating in food handling activities. Personnel with cuts and/or bandages not wearing vinyl gloves or not refraining from handling foods entirely.

In the standard of the standard such as tongs, spatulas, disposable gloves or other food dispensing apparatus.

When workers must taste the food, cleaned and sanitized utensils are not used, and/or the utensils are not immediately cleaned and sanitized after tasting and prior to tasting another food or the same food. od, Water and Ice from Approved Sources od & Water Obtained From Approved Sources (301) Water not bacteriologically or chemically safe Meat and fish from unapproved sources Unpasteurized milk or milk products Hot and cold running water not under pressure Ice not from a potable source or not handled in a sanitary manner Canned goods not obtained from approved commercial processor (no home canning) Steam contacting foods not from a potable source Water not from an approved source ood in Good Condition, Safe & Unadulterated (302) Food products found to be unclean, temperature abused, contaminated, damaged or in any way unsafe not rejected or segregated and/or the food is available for consumption Canned goods in unsatisfactory condition (leaking dented, rusted or swollen) Eggs dirty or cracked ood Properly Labeled (303) Food products received at premises not properly packaged and labeled. Shipping containers not labeled with the common name, net quantity, name and address of the responsible party, and a list of ingredients otentially Hazardous Foods Protected from Contamination ood Separated & Protected (401) Food not protected from customer contamination (e.g., buffets, salad bars)

Ready to eat foods not covered and not stored above raw foods in a refrigerator

Raw food and ready to eat food are handled at the same time by the same food

handler Raw food handled (prepared) adjacent to ready to eat foods

Food not covered properly and not in appropriate food grade containers/bins

ood Contact Surfaces Cleaned & Sanitized (402)

No approved sanitizing solution on premises wiping cloths dirty and/or not properly stored (sanitizer not used)

Food contact surfaces not washed, rinsed and sanitized after each use and following times when contamination may have occurred acllity Free Of Pests (Vermin & Insects) (403)

Evidence of insect pests in facility's food areas Evidence of rats or mice in facilities food areas

Evidence of insect pests in facilities non-food areas oxic Chemicals Properly Labeled, Stored and Used To Prevent Food Contamination (404)

Chemicals, cleaning and disinfecting compounds and other toxic substances kept in a food premises not used in compliance with the manufacturer's labeling, directions or specifications

Chemicals, cleaning and disinfecting compounds and other toxic substances not stored in labeled containers and not stored in a separate compartment away from food, food contact surfaces and utensils

Food not protected from contamination during transportation / display

likelihood of the food becoming contaminated.

Evidence of rats or mice in facilities non-food areas

Evidence of other pests in facilities food or non-food areas

Insect control devices not installed or working, where needed

equipment or food contact surfaces

Food stored, displayed, prepared and served in a manner that increases the

Non-food items not stored in designated areas away from any food, food

Rodenticides and insecticides used in a food premises not used in such a manner as to prevent the contamination of food.
