

Do you have Syphilis?

You can't
always tell, so...
**GET TESTED
TODAY!**

There is a major syphilis outbreak in the NWT.

This serious sexually transmitted disease can be hidden in your body for years. It is easily cured, but if left untreated it can severely damage the brain, heart, and other organs. It can also be passed from a pregnant person to their baby.

Une version française est disponible.

If you have ever had the following symptoms (even if they went away) or if you have had oral, vaginal, or anal sex, ask your healthcare provider to be tested today:

- ! Painless open sores in the mouth or genitals
- ! Fatigue
- ! Hair loss
- ! Swollen Glands
- ! Rash - not itchy
- ! Sore throat
- ! Fever
